

Prof. Michael E. Porter;

“Innovation is the central issue in economic prosperity.”

**Clusters are geographical areas in which firms in related services are co-located.**

**Innovation is the process of introducing something new and the new thing itself.**

**This process involves successful creation, development, and marketing of the new thing and the new thing itself.**

## Composition;

- ❑ **Facilitators**
- ❑ **Cluster Companies**
- ❑ **Leadership Team**

The Core Team;  
Management  
&  
Administration

Our Vision;

**To make Kampala  
recognized as the great  
lakes hub of software  
development by 2015  
and the leading mover  
of the Ugandan  
economy.**

- 1. To promote standardized projects and business management systems within cluster members**
- 2. To actively build collaboration and linkages among cluster members and stake holders**
- 3. To establish and maintain sustainable structures that will enable the cluster to run as a professional and profitable entity**
- 4. To stimulate and promote innovation amongst cluster members**

## Our Achievements;

1. Strategic Plan obtained
2. Annual Barcamp
3. Workshops and Seminars
4. ISCP Website

## The Challenges;

1. Busy Schedules for all stakeholders.
2. Funding.
3. Building Confidence and Trust.

## The Future;

1. The Strategic Plan
2. The National ICT Awards
3. The Incubation Center
4. E-Learning Project

## The Conclusion;

- **The phenomenon of using ICTs particularly software to raise productivity has helped several nations with business investments in ICT to achieve higher levels of real, non-inflationary growth and increase in living standards.**
- **Ours is a simple commitment to establish a strong vibrant capacity in ICT innovation, enhancing the rate, quality of flow and transformation of innovative ideas into new products and businesses.**

*Thank you.*

***Yes We Can!***
